maximing wildlife returns by minimising threats...

Human wildlife conflict Poaching Perform **M**dicators erformance in 2020 Human wildlife conflict trend Number of incidents per year the chart shows the total number of incidents each year, Commercial poaching is a serious threat to subdivided by species, grouped as herbivores and predators conservancy benefits. The chart shows the **Performance** number of incidents per category ate staffing Subsistence Leopard Other Predators Commercial 2 Adequate expenditure Elephant Other Herbivores High Value 160 3 Audit attendance 140 4 NR management plan 120 100 5 Zonation 80 6 Leadership 60 7 Display of material 20 8 Event Book modules 9 Event Book quality 2012 2013 2014 2015 2016 2017 2018 2019 2010 2023 2024 2025 2020 2021 2020 2020 2020 10 Compliance 11 Game census Most troublesome problem animals 2018-2020 Traps and firearms recovered number of incidents per category 12 Reporting & adaptive management the chart shows the number of incidents per species for the last 3 years; the darkest bar (on the right) indicates the current year for each species 13 Law enforcement ☐ Firearms recovered The least troublesome species The most troublesome species in 2020 are on the right ■Traps/snares recovered 14 Human Wildlife Conflict in 2020 are on the left 50 15 Harvesting management 40 16 Sources of NR income 30 17 Benefits produced 20 18 Resource trends 10 19 Resource targets 2012 2013 2014 2015 2016 2013 2016 2019 2010 Leopard Hyaena Elephant Cheetah Key to performance indicators Type of damage by problem animals 2018-2020 Arrests and convictions weak/bad the chart shows the number of incidents per category for the last 3 years; reasonable good number of incidents per category the darkest bar (on the right) indicates the current year for each type Performance is assessed on a scoring system from zero (none) to a 200 maximum of between 3 and 6 (strong/excellent) depending on the ■ Convictions 150 Indicators 1-17 reflect the performance of the management team in 3 100 place in the conservancy and an efficient team can achieve a good rating in all 17 indicators. 50 Indicators 18 & 19 are influenced by external factors and are not considered a reflection of conservancy management. They indicate the current status of wildlife in the conservancy in relation to a Other damage Crop damage Human attack Livestock theoretical optimal situation. Toy Toy Toy Toy Toy Toy Toy Toy

Wildlife removals – quota use and value

Potential value estimates (N\$) for a single animal:	Species	Quota 2020			Animals actually used in 2020						Potential	
		Total	Trophy	Other Use	Trophy	Own Use &	Shoot &	Capture & Sale	Problem Animal	Total Use	Trophy	Other use
 Potential trophy value - the average trophy value for that species in the conservancy landscape 						Premium	Sell				Value N\$	Value N\$
	Kudu*	1		1								10,842
trophy values vary depending on trophy quality, international recognition of the hunting operator and the hunting area	Springbok	2		2								702
Potential other use value - the average meat value for common species												
meat value for common species												
or												
the average live sale value of each high value species (indicated with an *). High												
value species are never used for meat												
Fractions of animals indicate that a quota of 1 animal was awarded with conditions i.e. a) over a period of several years												
and/or b) is shared with other conservancies												
2, is shared than sure. Someon various												
b) is shared with other conservancies

monitoring numbers and trends for a healthy conservancy...

Current wildlife numbers and status

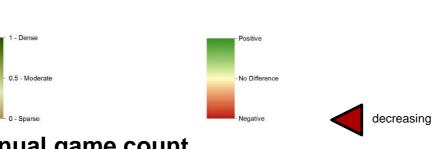

Vegetation monitoring

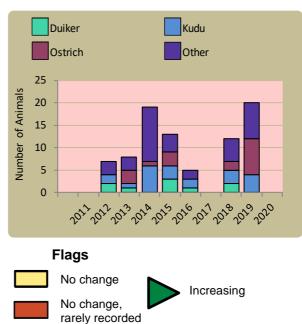

Green vegetation index (NDVI). Maps show vegetation cover during Feb-Apr of the current year and the difference between the current year and the long-term average (2003-2018)

NDVI 2019

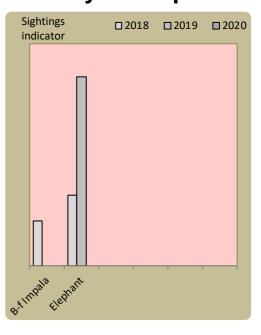

NDVI 2019 - NDVI (2003-2018) Average

Wildlife mortalities

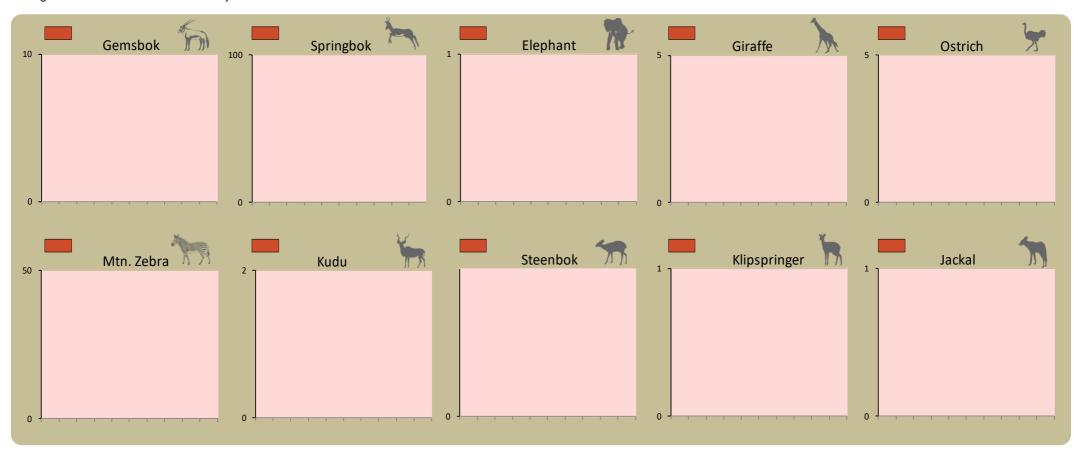

Locally rare species

Locally rare species are not found very often in the conservancy and need special conservation attention.

Annual game count

Charts show the number of animals seen each year per 100 km driven during the game count. As a point of reference the dashed horizontal line represents the combined 10 year average in Palmwag and Etendeka concessions. Status flags reflect the general count trend over the last 5 years.

Predator monitoring

charts show the average number of animals seen per Event Book each year status barometers reflect the general sightings trend over the last 5 years
