

maximising wildlife returns by minimising threats...

Performance Indicators

Management performance in 2022		
Category	Performance	
1 Adequate staffing	3	4
2 Adequate expenditure	3	4
3 Audit attendance	3	4
4 NR management plan	2	3
5 Zonation	2	3
6 Leadership	3	4
7 Display of material	2	3
8 Event Book modules	2	3
9 Event Book quality	3	4
10 Compliance	2	3
11 Game census	3	4
12 Reporting & adaptive management	3	4
13 Law enforcement	3	4
14 Human Wildlife Conflict	1	2
15 Harvesting management	1	2
16 Sources of NR income	1	2
17 Benefits produced	1	2
18 Resource trends	1	2
19 Resource targets	1	2

Key to performance indicators

weak/bad	reasonable	good

Performance is assessed on a scoring system from zero (none) to a maximum of between 3 and 6 (strong/excellent) depending on the indicator.

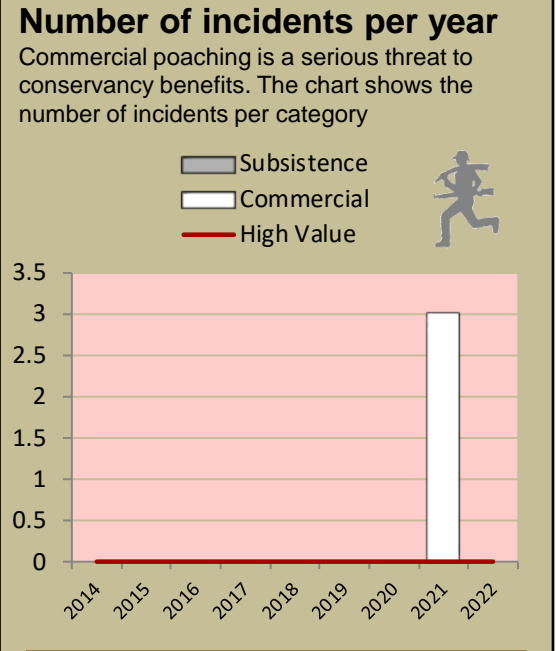

Indicators 1-17 reflect the performance of the management team in place in the conservancy and an efficient team can achieve a good rating in all 17 indicators.

Indicators 18 & 19 are influenced by external factors and are not considered a reflection of conservancy management. They indicate the current status of wildlife in the conservancy in relation to a theoretical optimal situation.

Human wildlife conflict

Poaching

Wildlife removals – quota use and value

Potential value estimates (N\$) for a single animal:	Species	Quota 2022			Animals actually used in 2022						Potential	
		Total	Trophy	Other Use	Trophy	Own Use & Premium	Shoot & Sell	Capture & Sale	Problem Animal	Total Use	Trophy Value N\$	Other use Value N\$
		<ul style="list-style-type: none"> Potential trophy value - the average trophy value for that species in the conservancy landscape <p>trophy values vary depending on trophy quality, international recognition of the hunting operator and the hunting area</p> <ul style="list-style-type: none"> Potential other use value - the average meat value for common species <p>or</p> <ul style="list-style-type: none"> the average live sale value of each high value species (indicated with an *). High value species are never used for meat <p>Fractions of animals indicate that a quota of 1 animal was awarded with conditions i.e.</p> <ul style="list-style-type: none"> a) over a period of several years and/or b) is shared with other conservancies 	Kudu	1		1						

Effective monitoring is key to understanding the status of wildlife in the conservancy and for the effective management of these resources.

Conservancies reduce environmental costs while increasing environmental returns. Returns from wildlife can far outweigh human wildlife conflict costs.

monitoring numbers and trends for a healthy conservancy...

Current wildlife numbers and status

Species	Animals Seen 2022	Estimated population range	Wildlife Status	
			Count Trend	Landscape Status
Elephant				
Gemsbok				
Giraffe				
Jackal				
Klipspringer				
Kudu				
Mtn. zebra				
Ostrich				
Springbok				
Steenbok				

No counts undertaken

Key to wildlife status

Key to count trend

dark green – strong increase
light green – slight increase
yellow – more or less stable
light orange – slight decline
dark orange – strong decline

Wildlife status summary is based on both the species trend and its status in the landscape

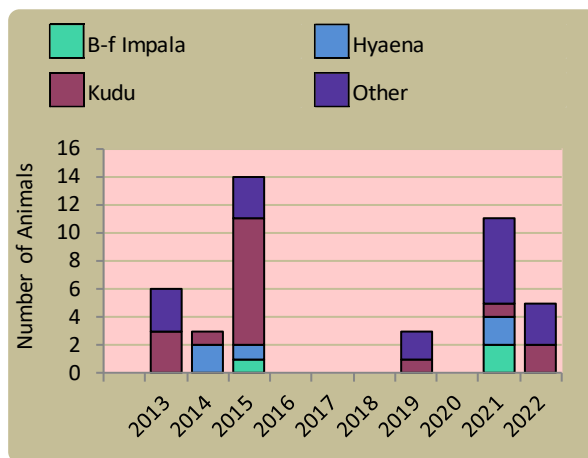

Wildlife status summary in 2022

Wildlife introductions

Wildlife mortalities

Locally rare species

Annual game count

Charts show the number of animals seen each year per 100 km driven during the game count. As a point of reference the dashed horizontal line represents the combined 10 year average in Palmwag and Etendeka concessions. Status flags reflect the general count trend over the last 5 years.

Locally rare species are not found very often in the conservancy and need special conservation attention.

Predator monitoring

charts show the average number of animals seen per Event Book each year status barometers reflect the general sightings trend over the last 5 years

Wildlife provides a wide range of benefits. Some wildlife can cause conflicts, but all wildlife is of value to tourism, trophy hunting and a healthy environment.

By using all the available information and adapting and improving activities, threats such as human wildlife conflict, poaching and other issues can be minimised.

Enabling wise conservancy governance...

Conservancy Statistics

Date Registered:	May 2012
Population (2011 census):	2000
Size (square kilometres):	871
Registered members:	560

Key Compliance Requirements

Was an AGM held?	✓
Were elections held?	✓
Were benefits distributed according to the BDP?	✗
Is game managed according to the GMUP?	✗
Was the financial report presented and approved?	✗

Conservancy Governance

	Male	Female	Total
Number of management committee members	12	2	14
Attendance at AGM	73	31	104
Date of the last AGM:	01/11/2022		
Date of the next AGM:			
Other important issues			
Budget approved?	✗		
Work plan approved?	✓		
Annual conservancy report approved?	✓		

Benefit Distribution

Type	Description	Beneficiary	Number
------	-------------	-------------	--------

Employment

	Male	Female	Total
Conservancy staff (Incl. CGG & CRM)	6	0	6
Number of Community Game Guards	6	0	6
Number of Community Resource Monitors			

Governance Performance Rating How well did the conservancy perform in the past year?

Performance Category	This Year	Prev. Year	Explanation of performance category
Member engagement	moderate	weak	The conservancy is adequately engaging its members
Benefit planning	none	none	The conservancy developed its BDP in a transparent and participatory manner
Benefit distribution	none	none	The conservancy distributes benefits to its members in a fair, transparent and equitable manner
Accountability	weak	moderate	Conservancy members are holding the management committee accountable
Stakeholder engagement	weak	strong	The conservancy maintains relationships with key external stakeholders
Financial management	none	none	The conservancy is effectively managing its finances
