Adapting in response to the current environmental conditions ...

Seasonal trends in rainfall and vegetation (2023 / 2024 Season)

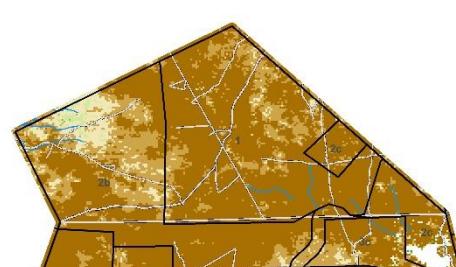

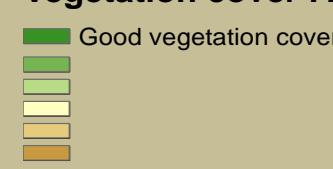

Vegetation cover trend (2000 - 2023)

High vegetation cover is good because more rainwater is prevented from running off, causing less erosion. Also, the soil is shaded leading to a decrease in soil temperature and evaporation.

Plant cover is decreasing - Why?

Forage availability

During the growing season enough forage must be produced to sustain livestock and game until the next rainy season

Management Options

- Move animals to better grazing
- Sell old and unproductive animals

Below normal forage availability - Enough for livestock and game?
