BENEFITS FROM NATURAL RESOURCES

Tourism provides a variety of economic opportunities. Conservancy enterprises such as the Sesfontein Fig Tree and Sesfontein Kanamub Mountain Campsites generate income and employment.

The Palmwag Tourism Concession generates benefits for neighbouring conservancies and is a refuge for wildlife.

Conservancy residents engage in a variety of livelihood activities including livestock herding, crop production and natural resource use.

The conservancy has a committee and employs staff and is managed using a mixture of modern methods & technologies and traditional knowledge & skills.

Conservancy activities include game counts and patrols, monitoring using the Event Book, mitigating human wildlife conflict and facilitating development.

Community Game Guards employed by the conservancy monitor wildlife and other resources and create the foundations for adaptive management.
